lowest possible cost. BCBSU structured a new subsidiary, ValueCare which was initially offered in the Salt Lake City, Ogden, Northern Utah and Utah County areas and is now to be offered in the Wasatch County area. ValueCare will offer the concerned public an option for comprehensive health care coverage not previously available.

ValueCare will be advantageous to physicians, hospitals, employers, subscribers and the community. Employers will gain from the option to purchase more comprehensive health care financial effects concerning their choice of providers. Physicians and hospitals will gain by being identified as ValueCare providers, thereby attracting and retaining ValueCare subscribers who might otherwise seek care without regard to the cost to them. The community benefits by having a product available that helps to reduce health care costs.

The schedule for application by physicians is as follows:

Nellie North Postmaster
Charleston

F = Wm H North (owner of Charleston Store)

M = Carrie Steadman - Caroline

Nellie Md. Warren Farnsworth

Children: Warren & Nellie;

advantages are:

1. Patient Volume

ValueCare subscribers will have financial incentives to choose ValueCare providers. Subscribers entering the health care system for the first time will have a list of ValueCare providers from which to choose; subscribers already in the health care system may choose to move to ValueCare providers for economic reasons. The revenue from this patient volume may be significant.
